# Infinity Studios

## Art that inspires, technology that transcends

At Infinity Studios, we don't just imagine worlds: we build them. We are the creative production company behind Windows to Infinity and the technical soul of each of its experiences.

We design, produce, and assemble complete exhibitions, from the very first idea to the moment the lights go on, combining expertise, art, and technology to shape your projects so they are not just visited, they are truly lived.

**Our philosophy is simple yet strong:**  
"Art always comes first; technology enhances it, never replaces it."

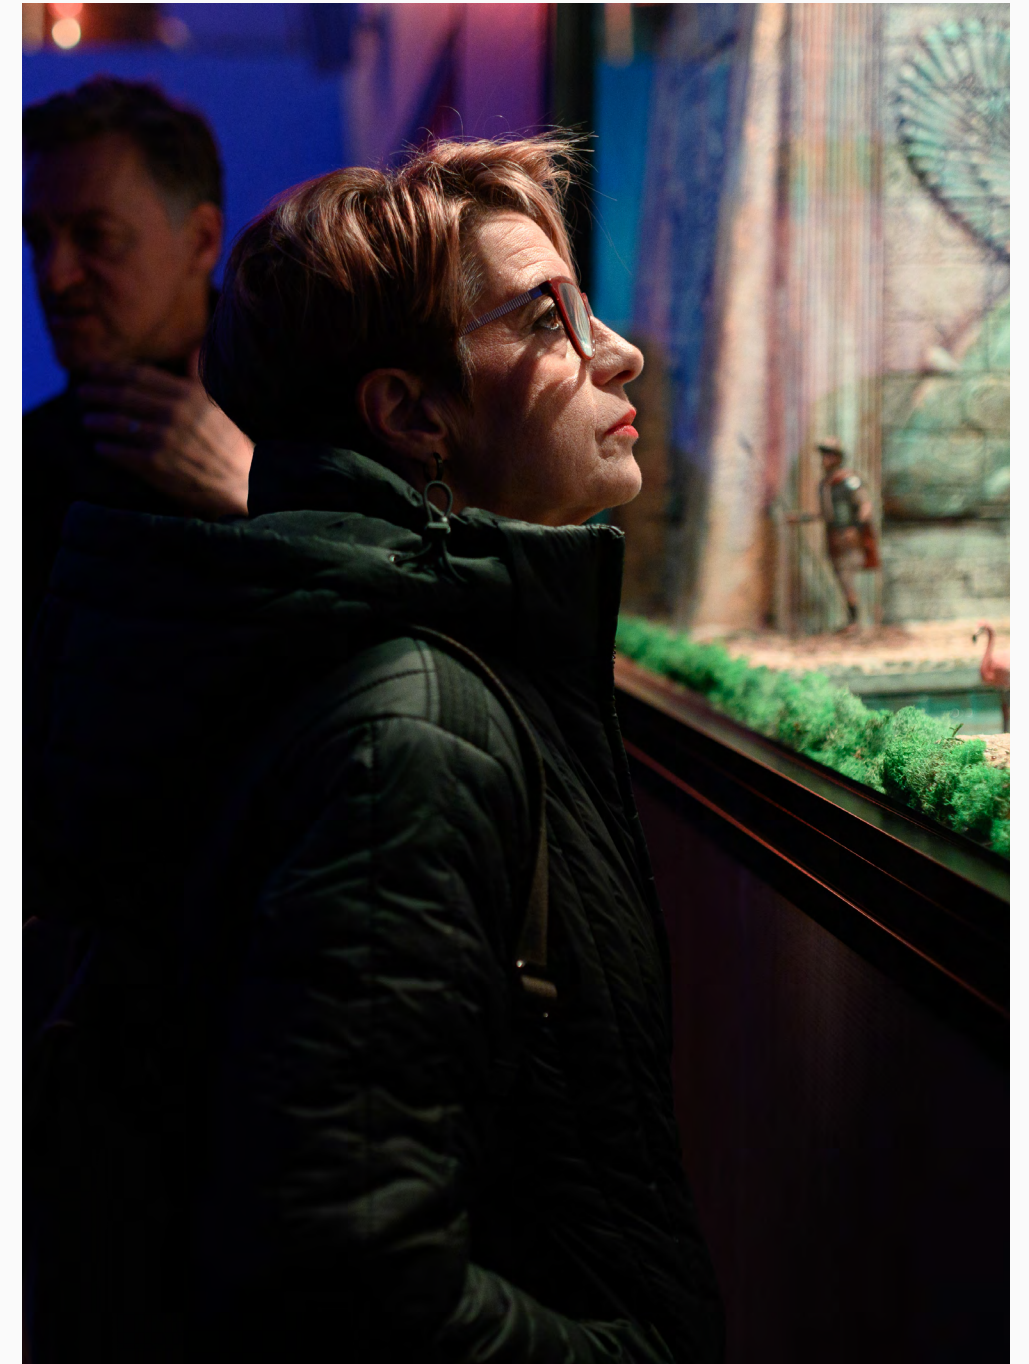

# We create tailor-made experiences

We collaborate with museums, cultural centres, and international brands to bring unique projects to life. We can develop a complete exhibition or step in at any stage of the creative or assembly process, bringing our artistic, technical, and operational expertise to the project.

Our team combines artistic sensitivity with technical precision to transform ideas into memorable experiences. Each project is approached with a holistic vision, blending art, technology and construction to create spaces that are both functional and emotional.

### Immersive experiences and content

We develop narrative universes, characters, sculptures, dioramas, and physical artwork that bring exhibition spaces to life and elevate the visitor experience.

We can create complete experiences or provide specific elements: videos, projections, animations, or artistic pieces, all adapted to the language and identity of each institution.

### Design and construction

We offer professional services for constructing or adapting galleries, exhibition areas, shops, and cultural spaces.

We craft custom display furniture, showcases, counters, and tailored technical elements, combining aesthetics, functionality, and durability.

#### Assembly and support

We have our own team of experienced assemblers capable of executing complex projects anywhere in the world. We provide services to companies, museums, and external production studios that require technical or logistical support for setting up their exhibitions. We adapt to each space and every team, offering precision, efficiency, and absolute commitment to the final result.

### Artistic and technological integration

We integrate virtual reality, augmented reality, video projections, sound, lighting, and 360° rooms into exhibition projects, expanding the sensory possibilities of art.

Technology becomes a creative language within the artwork, always with emotion at its heart.

### 360° production

At Infinity Studios, we can handle everything: from the creation of a single artwork or artistic universe to the full construction, assembly, and launch of an entire exhibition. We are creators, manufacturers, and assemblers, transforming artistic vision into tangible experience.

Where the artwork  
is born

At Infinity Studios, we have our own facilities covering over 10,000 m<sup>2</sup> in Madrid and Tarragona, conceived as a vast creative ecosystem where art, technique, and precision work in perfect harmony.

We have multiple specialized departments, including carpentry, sculpture, cinematography, artistic painting, digital printing, 3D printing, aluminium and iron cutting, milling, electronics, sound, and areas for technical assembly and finishing. Each space is designed to ensure total autonomy and guarantee that every piece is produced with the highest control and quality standards.

Complementing our workshop, our technical and creative studio unites a multidisciplinary team of professionals who transform ideas into real experiences, blending inspiration, technique, and flawless production management for exhibitions, museums, and cultural centres.

From technical drawing and 3D design to animation, virtual reality, audiovisual content creation, and graphic design, we cover every field required to bring any artistic or museum project to life.

This structure is complemented by the talent of our artists, sculptors, designers, and assembly technicians, the people who breathe life into every piece. Their experience, precision, and dedication ensure that every installation, whether in a museum, exhibition, or traveling show, is executed with the same passion with which it was conceived.

**At Infinity Studios, creation is a complete process: from the first idea to the moment the lights go on, everything is conceived, crafted and completed under one roof by the hands of our own artists and technicians.**

# Smart design and international logistics

A traveling exhibition doesn't begin in the gallery, it begins on the road. We design with a global mindset. From the very beginning we consider transport, assembly, and efficiency.

We adapt each project to the dimensions and weight requirements of European trailers and maritime containers. We optimize volume and structural strength without sacrificing aesthetics or expressiveness.

We work with an international network of logistics operators, ensuring safe deliveries anywhere in the world. Our modular structures enable fast, precise, and sustainable setups.

*Creating with logistical intelligence is an art form in itself.*

*"The quality of our work lies in the unconditional support we provide from the planning to the final moments of the execution stage and everything in between."*

*"We are defined by our passion for what we do, the efficiency of our results, and our absolute commitment."*

# Experience and trust

With more than four decades of experience in international production and assembly, our team has collaborated with institutions and creative studios across all of Europe. We are defined by efficiency, creativity, and absolute dedication—we never leave a project until everything works perfectly.

Our path has been forged on trust and excellence, with clients who have stayed with us for over 35 years. We know that the details make the difference between what's simply good and what's truly unforgettable.

**Infinity Studios: where art becomes experience, and technique becomes emotion.**

# What our clients say

*"We are very satisfied with their service and the personalized attention they provide. Their adaptability is truly impressive."*

Alicia Pando - JHK

*"This team provided support throughout the entire process, and became an integral part of our company. Their professionalism has earned our absolute trust."*

Jaume Carreras - Solo midocean

*"Our brands have been in numerous European countries for over 2 years, and this team has been with us every step of the way. Their image, design, quality, reliability, and trustworthiness are values that define them, and we share these values completely."*

Sergio Izquierdo - Gorfactory

*"This team accompanied us throughout the project with adaptability and a constant focus on problem-solving."*

Xavier Marín - ID GAMAX

*"They are professional, efficient, and work quickly, finishing projects flawlessly. They are a true support for us in setting up our projects."*

Marie Clairbois - C!Print

*"The professionalism, enthusiasm, creativity, and passion with which this team approaches every one of our projects is a guarantee of success from the very first moment."*

Rosa Pujolas - ZimVie

*"We have complete trust in them. They provide a comprehensive, top-quality service, guiding and supporting the client from start to finish."*

Marta Fraile - Roland DG Iberia

*"They are the team we rely on throughout Europe. They always deliver quality, originality, and punctuality."*

Raquel Rubio - Roly

# Our values

## *Commitment to Culture*

At Infinity Studios, we understand culture as an essential asset, a common language that connects people across borders and generations. Our work goes beyond showcasing art: we exist to share it, make it accessible, and bring it closer to every audience. We collaborate with museums, institutions, and creators from around the world to ensure that each project becomes a living, open, and participatory experience.

**We believe that culture does not belong to anyone, it belongs to everyone.**

## *Commitment to the Planet*

Commitment to the Planet. From the very beginning, Infinity Studios was founded on a clear principle: to create without destroying. That's why we work with recycled materials, modular structures, and low-energy technology. Every installation is designed with respect for the Earth, reusing and transforming what others discard. The mark we leave is not physical; it is emotional.

**Because art should not leave waste... only memories.**

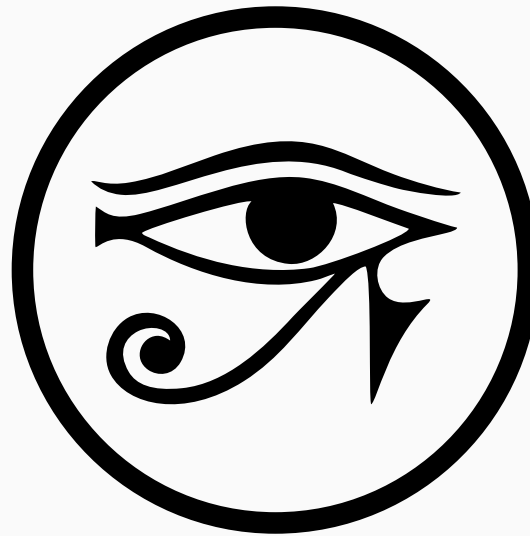

*Every great creation begins with a conversation.*

*We listen, imagine, and bring ideas and dreams to life.*

*We are here to turn your idea into an unforgettable experience.*
